- Agency services for buying, selling, and consignment of goods.

4. Normal Business Cycle

The normal operating cycle of the company is 12 months.

The average production cycle of the industry is 12 months.

5. Characteristics of the Company's Operations During the Financial Year Affecting the Combined Financial Statements

During the accounting period, there were no significant characteristics affecting the financial statements. The company's activities have proceeded as usual during all periods of the year.

6. Corporate Structure

- The company has invested 100% of the capital in its subsidiary:
  DAC Anti-counterfeit Technology Co., Ltd., with an investment capital of VND 5,400,000,000 (Five billion four hundred million VND).
- The company has one dependent accounting branch established on June 17th, 2015, at:
  C1 Street, Pho Noi A Industrial Park, Nhu Quynh Ward, Hung Yen Province.

II. ACCOUNTING PERIOD AND CURRENCY USED IN ACCOUNTING

Accounting Period

The company's accounting period starts from January 1st and ends on December 31st of each calendar year.

Currency Used in Accounting Vietnamese Dong (VND)

III. APPLICABLE ACCOUNTING STANDARDS AND POLICIES

Accounting Regime Applied

The company applies the Accounting Regime for Enterprises issued under Circular No. 99/2025/TT-BTC dated 27/10/2025, takes effects from 01/01/2026 by the Ministry of Finance.

Declaration of Compliance with Accounting Standards and Regimes

The company has applied Vietnamese Accounting Standards and related guidance documents issued by the government. The financial statements are prepared and presented in compliance with the relevant standards, the guiding circulars, and the applicable accounting regime.

Accounting Method Applied
The company uses computerized accounting according to the voucher-based accounting method.

IV. APPLIED ACCOUNTING POLICIES

Recognition of Cash and Cash Equivalents
Transactions in foreign currencies are converted into Vietnamese Dong at the actual exchange rate at the time the transaction occurs. At the end of the year, foreign currency monetary items are revalued at the average interbank exchange rate published by the State Bank of Vietnam on the last day of the fiscal year.

Short-term investments (maturity within 3 months) that are easily convertible into cash with minimal risk of change in value from the date of purchase are classified as cash equivalents at the reporting date.

Inventory Recognition Principle
Inventory is recorded at cost. If the net realizable value is lower than the cost, it must be recognized at the net realizable value. The cost of inventory includes purchase costs, processing costs, and other directly related costs incurred to bring the inventory to its current location and condition.

The inventory value is determined using the weighted average method on a monthly basis. Inventory is accounted for using the periodic inventory method.

The value of finished goods inventory as of September 30th, 2026 is determined based on the ratio of cost of goods sold to revenue for the period.

Work-in-progress as of September 30th, 2026 is physically counted at each department and its value is determined by the actual value of the corresponding completed products.

A provision for inventory write-down is made at the end of the year for the difference between the cost of inventory and its net realizable value.

Recognition and Depreciation of Fixed Assets
Tangible and intangible fixed assets are recognized at cost. During use, tangible and intangible fixed assets are recognized at their historical cost, accumulated depreciation, and remaining value.

Depreciation is calculated using the straight-line method in accordance with Circular No. 203/2009/TT-BTC dated October 20th, 2009, and Circular No. 45/2013 dated April 25th, 2013. Circular 45/2013 dated April 25th, 2013.

Regulation on Recognizing and Allocating Prepaid Expenses
Prepaid expenses related to the current fiscal year's production and business activities are recognized as short-term prepaid expenses and are included in the operating expenses for the fiscal year.
The following expenses, which have arisen during the fiscal year, are recorded as long-term prepaid expenses to be allocated gradually to the results of business activities over several years:

- Large-value tools and equipment for use;

- Other long-term prepaid expenses.

The allocation of long-term prepaid expenses to production and business expenses for each accounting period is based on the nature and extent of each type of cost, with an appropriate allocation method and criteria chosen. Prepaid expenses are allocated gradually to production and business expenses using the straight-line method.

Regulation on Recognizing and Capitalizing Borrowing Costs
Borrowing costs are recognized as operating expenses in the period incurred, except for those borrowing costs directly related to the construction or production of qualifying assets, which are capitalized into the value of the asset (capitalized) when the conditions set forth in Vietnam Accounting Standard No. 16 "Borrowing Costs" are met.

Borrowing costs directly related to the construction or production of qualifying assets, which are capitalized, include interest expenses, amortization of discounts or premiums on bond issuance, and related costs incurred during the borrowing process.

Regulation on Recognizing Accrued Expenses
Accrued expenses that have not yet been incurred but are estimated and allocated as production and business expenses in the period are made to prevent unexpected fluctuations in operating costs, ensuring proper matching of revenues and expenses. When these expenses are incurred, any discrepancy from the previously estimated amount is adjusted in the accounting records by either adding or reducing the expense to reflect the difference. Accrued expenses in the year include unpaid interest expenses and other accrued liabilities.

Regulation on Recognizing Equity
The owner's equity investment is recognized based on the actual amount contributed by the owner.

Other equity of the owner is recorded at the remaining value between the fair value of assets that the company receives as donations or gifts from other organizations or individuals, after deducting any taxes payable (if applicable) related to the donated assets, and the amount added from business operations.

Undistributed profit after tax refers to the profit from business activities after deducting (-) adjustments due to retroactive application of accounting policy changes or corrections of material errors from previous years.

Undistributed profit after tax is handled according to the regulations of the Parent Company.

Revenue Recognition Principles and Methods
Revenue from Sales

Revenue from sales is recognized when the following conditions are simultaneously met:

- The majority of risks and benefits associated with ownership of the product or goods have been transferred to the buyer.
- The company no longer retains control over the goods as the owner or has the authority to manage them.

- The revenue is reliably measurable.
- The company has received or will receive economic benefits from the transaction.
- The costs related to the transaction can be determined.

Revenue from Service Provision

Revenue from service provision is recognized when the outcome of the transaction can be reliably measured. If the service spans multiple periods, revenue is recognized in the period based on the work completed as of the balance sheet date. The result of a service transaction is recognized when the following conditions are met:

- The revenue is reliably measurable.
- There is a possibility of receiving economic benefits from the service transaction;
- The portion of work completed by the balance sheet date can be determined;
- The costs incurred for the transaction and the costs required to complete the service transaction can be determined.

The completed portion of the service work is assessed based on the method of evaluating completed work.

Financial Income

Revenue generated from interest, royalties, dividends, profit distributions, and other financial income is recognized when both of the following conditions are met:

- There is a possibility of receiving economic benefits from the transaction;
- The revenue is reliably measurable.
- Dividends and profit distributions are recognized when the Company has the right to receive dividends or the right to receive profits from its investments.

Principles and Methods for Recognizing Financial Expenses

The expenses recognized as financial expenses include:

- Expenses or losses related to financial investment activities;
- Loan and borrowing costs;
- Losses from exchange rate fluctuations related to foreign currency transactions.

These expenses are recognized in full during the period they occur and are not offset against financial revenue.

Principles and Methods for Recognizing Current Corporate Income Tax Expense and Deferred Corporate Income Tax Expense

Current corporate income tax expense is determined based on taxable income and the applicable corporate income tax rate for the current year.

Deferred corporate income tax expense is determined based on the temporary differences that are deductible, taxable temporary differences, and the applicable corporate income tax rate.

V. ADDITIONAL INFORMATION FOR ITEMS PRESENTED IN THE BALANCE SHEET

Unit: VND
